

# KSi 4808NGA Seed Applicator Portable Unit

KSi Portable Units utilize standard equipment with minimal modifications to ensure the best seed treatment performance with long-term equipment flexibility.

The KSi 4808NGA Seed Applicator — featuring advanced and accurate seed treatment equipment technology — is now available in a portable unit.

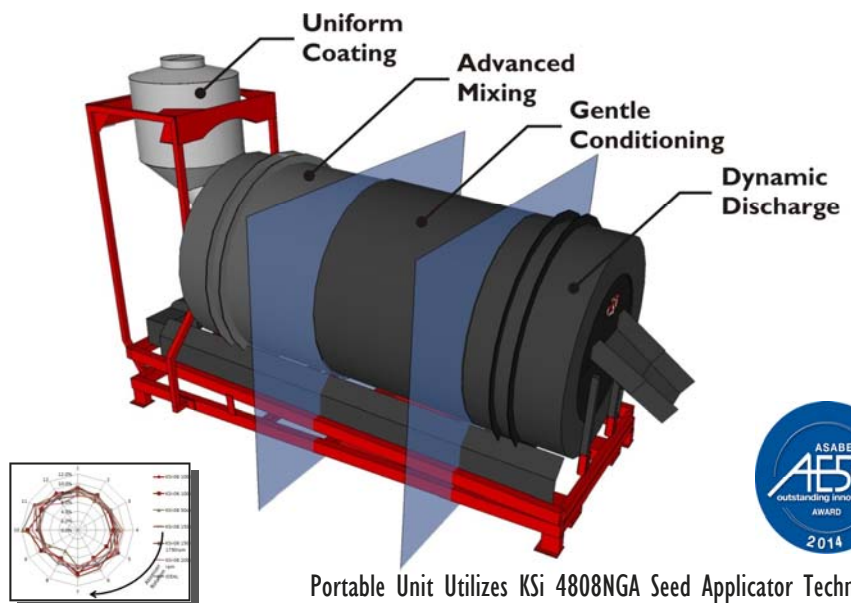

KSi 4808NGA Seed Applicator — Portable Unit

- Accurate initial chemical application
  - Large, thin, uniform, “seed curtain” flows around precisely designed atomizing disc with consistent chemical dispersion for uniform seed coating
- Engineered drum design
  - Innovative process mixes, polishes, and dries before dynamically discharging conditioned seed through the center of the drum for optimum plant-ability and highly marketable appearance
- KSi Automation integration
- KSi VariRate (loss-in-weight) seed metering control
- Convenient access/inspection
- Quick drum clean-out (30-50 sec) for fast throughput
- 600 - 2,500 lb/min
- 48” x 8’ Drum
- Diesel / Propane Generator options

Standard trailer with standard equipment meets DOT regulations.

\* Spill containment options available
